SUMMARY

AI/ML developer with 2+ years of experience specializing in Generative AI (GPT/T5/GANs), NLP, and data science for global clients. Proven track record in Python, SQL, PyTorch/TensorFlow, and Hugging Face; end-to-end delivery across API development, ETL pipelines, containerization, and cloud deployment (Docker, Kubernetes, AWS/GCP). Built scalable RAG systems and data pipelines with strong focus on latency, reliability, and security/compliance.

SKILLS

Programming	Python, C++, SQL, Node.js, Git
Generative AI	GPT models, T5, BERT/Sentence-BERT, GANs, Diffusion workflows
ML/AI	PyTorch, TensorFlow, Scikit-learn, XGBoost, LightGBM
APIs & Apps	FastAPI, REST, API design, Node.js services, unit testing, monitoring (logs/metrics)
Cloud & Deployment	AWS, GCP, Docker, Kubernetes, MLflow, Hugging Face Hub
NLP & Retrieval	Hugging Face Transformers, FAISS, spaCy, NLTK
Data Engineering	Pandas, NumPy; ETL workflows; batch/stream pipelines; performance optimization
Security & Compliance	AuthN/AuthZ, secrets management, rate limiting, PII/data privacy

EXPERIENCE

Data Collection Specialist (Contract) Summa Linguae Technologies	Mar 2024 – Present <i>Remote</i>
--	-------------------------------------

- Standardized multilingual LLM QA pipelines; improved dataset quality by 30% via reviewer calibration, scripted validation, and reproducible rubrics.
- Designed evaluation setups mirroring enterprise banking/NLP workflows to stress-test generative models for reliability, bias, and safety.
- Coordinated across product/linguistics/engineering in multiple time zones; aligned acceptance criteria, SLAs, and delivery milestones.

Freelance AI Developer Upwork	Jan 2023 – Present <i>Remote</i>
---	-------------------------------------

- Built a production QA/RAG system with Sentence-BERT, FAISS, and T5 achieving 85% SQuAD accuracy and <2s latency on 1M+ docs; exposed via FastAPI/Node.js endpoints; containerized and deployed on AWS/GCP with autoscaling.
- Created synthetic data pipelines (GAN/VAE) to augment 100K+ samples, cutting data acquisition costs by 60% and boosting LLM robustness by 25%.
- Designed finance-focused multi-agent assistants for anomaly/fraud detection; integrated 10+ banking/fintech APIs and distributed ledger technologies; reached 92% detection with 0.1% FPR; automated report generation with LLMs.
- Implemented secure API layers (auth, rate limiting, secrets, structured logging, unit tests); set up CI-based testing and uptime/latency monitoring for reliability.
- Delivered 15+ projects with 98% client satisfaction and average delivery 15% ahead of deadlines.

PROJECTS

Advanced QA/RAG System (Sentence-BERT & T5). Production-ready dense retrieval + generative pipeline with FAISS and T5; FastAPI REST/Node.js endpoints; Docker/Kubernetes deployment on AWS/GCP; sub-2s latency on 1M+ mixed-format docs (text + tables).

Demo: app-demo-t5.streamlit.app

Multi-Agent AI Finance Assistant. Unsupervised models (K-Means/DBSCAN) for anomaly surfacing + LLM-based narrative reports; integrated 10+ external APIs including distributed ledger technologies; packaged as secure REST microservice with monitoring; achieved 92% fraud detection at 0.1% FPR.

GitHub: github.com/shourabhpandey/ai-finance-assistant

Synthetic Data Generator for LLMs. GAN/VAE augmentation for low-resource language modeling; generated 100K+ samples; reduced data costs by 60% and improved robustness by 25%; modular ETL pipeline for reuse across domains.

Windows Sentiment Analysis Tool (Offline). Local GUI tool with scikit-learn/NLTK; 92–94% accuracy on offline inputs up to 10MB; optional FastAPI local API; designed for privacy-first deployments.

CERTIFICATIONS & ACHIEVEMENTS

- [IBM AI Engineering Professional Certificate \(2024\)](#)
- [IBM Data Science Professional Certificate \(2024\)](#)
- [TensorFlow for Deep Learning Bootcamp \(2024\)](#)
- [Math for Machine Learning – Imperial College London \(2023\)](#)
- Competitive Programming: LeetCode 500+ problems; HackerRank Gold (Python, SQL, Git)

LEADERSHIP & COMMUNITY

- Author of practical AI/ML articles on [Medium](#) (NLP, LLMs, RAG, data pipelines).
- Organized and mentored local ML workshops for non-CS professionals moving into AI roles.
- Contributed to open-source NLP/ML repositories on GitHub; maintained 30+ day commit streak; active in reviews/issues.
