OBJECTIVE

Self-taught Machine Learning Engineer and Data Scientist with 2+ years of hands-on experience specializing in NLP, LLMs, and synthetic data generation. Strong track record in freelance AI solutions and full-stack ML product development. Seeking opportunities in AI-first teams or product startups focused on real-world impact and innovation.

SKILLS

Programming	Python, C++, HTML, CSS, LaTeX, SQL, MySQL
ML/AI	TensorFlow, PyTorch, Scikit-learn, Keras, XGBoost, LightGBM
NLP	Hugging Face, Sentence-BERT, FAISS, T5, GPT, NLTK, spaCy
Data	Pandas, NumPy, Matplotlib, Plotly, Seaborn, OpenCV
Dev Tools	Git, GitHub, VS Code, PyCharm, Docker, MLflow
Cloud	AWS, GCP, Firebase, Hugging Face Hub
Soft Skills	Communication, Problem-solving, Adaptability, Remote Collaboration

EXPERIENCE

Freelance AI Developer

Upwork

Jan 2023 – Present

Remote

- Developed a desktop-based sentiment analysis tool using NLTK & scikit-learn, achieving 92% accuracy on customer reviews.
- Built scalable QA systems using Sentence-BERT, FAISS, and T5 with 85% SQuAD accuracy and sub-2s response time on 1M+ docs.
- Created synthetic data pipelines (GAN/VAE) for low-resource language modeling, boosting LLM robustness by 25%.
- Designed finance-focused multi-agent assistants for real-time anomaly detection, integrating 10+ banking APIs.
- Delivered 15+ projects with 98% client satisfaction and consistent early delivery (avg 15% ahead of deadlines).

Data Collection Specialist

Summa Linguae Technologies

Mar 2024 – Present

Remote

- Contributed to multilingual LLM evaluation and QA for international NLP projects.
- Collected and validated response data from AI systems, improving dataset quality by 30% via manual and scripted QA.
- Collaborated across time zones with global teams to standardize prompt evaluation pipelines.

PROJECTS

Advanced QA System (Sentence-BERT & T5). Built a production-ready QA platform using dense retrieval and generative models. Integrated FAISS and T5 for fast querying and accurate answers on mixed-format input (text + tables).

Demo: app-demo-t5.streamlit.app

Multi-Agent AI Finance Assistant. Designed anomaly detection agents using K-Means/DBSCAN and report generation tools. Achieved 92% fraud detection with 0.1% FPR.

GitHub: github.com/shourabhpandey/ai-finance-assistant

Windows Sentiment Analysis Tool. GUI-based local tool using scikit-learn/NLTK with 94% accuracy on offline textual inputs up to 10MB. Ideal for enterprises with data privacy needs.

Synthetic Data Generator for LLMs. Built GAN/VAE-based synthetic pipelines to augment 100K+ samples, reducing data acquisition costs by 60%.

CERTIFICATIONS & ACHIEVEMENTS

- IBM AI Engineering Professional Certificate (2024)
- IBM Data Science Professional Certificate (2024)
- TensorFlow for Deep Learning Bootcamp (2024)
- Math for Machine Learning – Imperial College London (2023)
- LeetCode: 500+ problems — CodeChef: 3-star — HackerRank: Gold (Python, SQL)

LEADERSHIP & COLLABORATION

- Led freelance project teams on Upwork with international clients across USA, Europe, and Asia.
- Organized and mentored local ML workshops for non-CS students aiming to enter AI field.

EXTRA-CURRICULAR

- Write and publish technical blog posts on Medium on NLP, LLMs, and career switching into AI.
- Actively contribute to GitHub repos for NLP and ML pipelines. 100+ commit streak maintained.
- Participate in online coding contests (LeetCode, HackerRank) to stay sharp in algorithms and data structures.
